

OMAR ALIYEV

Threat Detection & Incident Response

☎ +994-70-444-04-04

✉ omeraliyev207@gmail.com

📍 Dubai, United Arab Emirates

SKILLS

- SIEM Monitoring (Splunk)
- Log Analysis
- Alert Triage
- Phishing Investigation
- Windows Event Logs
- Sysmon / Process Analysis
- Network Fundamentals (TCP/IP)
- Incident Documentation
- MITRE ATT&CK Basics
- Linux Fundamentals

EDUCATION

Bachelor of Computer Science/Cyber Security

2024-2028

University of Wollongong in Dubai

Certifications

- Cisco — Cybersecurity Fundamentals
- IBM — Cybersecurity
- Linux Foundation — Cybersecurity Essentials (LFC108)

LANGUAGES

- English (Fluent)
- Russian (Intermediate)
- Azerbaijani (Native)
- Turkish (Native)

PROFESSIONAL SUMMARY

Cybersecurity student with hands-on experience in alert triage and log analysis through simulated SOC environments, including phishing investigation and Sysmon-based process monitoring in Splunk. Detail-oriented and eager to bring that foundation to a Junior SOC Analyst role.

CYBERSECURITY EXPERIENCE

Security Operations & Threat Detection

Security Operations & Log Analysis

- Triaged security alerts across a range of attack scenarios, determining true positives from false positives to prioritize response
- Investigated log data to trace indicators of compromise, identifying root cause and documenting findings for case reporting
- Analyzed phishing attempts and applied structured incident-response steps to contain and report threats

Network & Endpoint Analysis

Technical Practice

- Inspected network traffic using Wireshark and performed host/service enumeration with Nmap to assess exposed attack surfaces
- Reviewed Windows event logs and Sysmon telemetry to identify suspicious process execution and command-line activity
- Mapped observed adversary behavior to MITRE ATT&CK techniques to support threat classification

Web Development

Independent Projects

- Built and deployed full-stack web platforms (kesf.az, shaffaf.ae, tzconstruction.ae), managing backend architecture and production deployment
- Developed using Node.js, JavaScript, and SQL/SQLite
